PALAIS
GLOCKENBACH

NEO-RENAISSANCE PALAIS A RARE GEM BROUGHT BACK TO LIFE

The Palais ensemble, listed for historical protection, consists of the Stadtpalais with its impressive stucco facade and the Gartenpalais at the rear. It was built in 1879–1880 in the Neo-Renaissance style by Kaspar Griner. Both Palais buildings are connected by the ensemble's garden apartment and are stylishly surrounded by a picturesque courtyard garden that is closed off from the street.

The Palais ensemble is located in Munich's highly sought-after neighbourhood Glockenbachviertel at the traffic-calmed Thalkirchner Straße 80. The perfect inner-city location and the proximity to the renaturalized river Isar offer the highest quality of life.

We have extensively renovated the, for historical protection, listed Palais ensemble, carefully expanded it and brought it up to the latest technical standards. You can expect 30 incredibly stylish historical-building apartments ranging from 37 to 144 sqm, renovated with great attention to detail. The small kindergarten in the Stadtpalais and the large gym with a sauna in the Gartenpalais further enrich the ensemble.

We would be delighted to welcome you to the Neo-Renaissance Palais for a viewing.

The proximity to the clean, renaturalized river Isar allows one to live simultaneously in one of the city's most desirable neighbourhoods and within one of the most beautiful stretches of nature. This area's combination of culture, lifestyle, and recreational space is unique and can hardly be found in any other German metropolis.

LIFE NEXT TO

MUNICH AND IT'S POPULAR
GLOCKENBACHVIERTEL
HIGHEST QUALITY OF LIFE
NEXT TO THE RIVER ISAR

THE RIVER ISAR

THREE NEIGHBOURHOODS CONNECTED BY THALKIRCHNER STRASSE

The three-kilometre-long Thalkirchner Straße connects the neighbourhoods Glockenbachviertel, Schlachthofviertel and Sendling. It begins in the very centre of Munich at Sendlinger Tor, where hip cafes and restaurants with extended terraces line up next to boutiques and flower shops. With the adjacent Südfriedhof, the old south cemetery, a large green park opens up, inviting you to take a stroll, or relax under the tall trees on hot summer days. The beautiful Isar meadows with the popular Isarpark are very close and can be reached via the historic Wittelsbacherbrücke.

RECREATIONAL AREA: ISAR

The quality of the bathing water of the Isar in the Munich catchment area is unique in all of Europe. The renaturation of the 8 km long river landscape between Großhesseloher Brücke and Deutsches Museum from 1995 onwards gave the Isar waters more space, which led to the development of new natural areas. The riverbed was widened, and the straight, stone banks gave way to flat, partially terraced, walkable banks. This created natural recreational areas in the middle of the city, which are appreciated by locals and visitors alike at all times of the day and year.

FRIEDRICH VON GÄRTNER

was a famous architect in Munich who was not only responsible for the new part of the Südfriedhof, but also planned and built well-known buildings such as the Feldherrenhalle, the Isartor, and the Bavarian State Library. After his death, the famous Gärtnerplatz, the central square of the newly built Isarvorstadt, was named after him.

MÜNCHNER SÜDFRIEDHOF

Gärtnerplatztheater, theater

Praterstrand, Prater Island

**FOR GOURMETS, NIGHT OWLS
AND NATURE LOVERS**

Thalkirchner Straße continues into Schlachthofviertel, which, in addition to its name, is also a secret gourmet quarter among Munich connoisseurs. In addition to the Frischeparadies and the many fantastic restaurants, cafés, and bars, a craft beer scene has also been established here. Young people roam the creative Bahnwärterthiel grounds next to the newly opened Münchner Volkstheater, built in the quarter’s typical clinker brick building style.

Atlantik Fisch, restaurant

Fugazi, restaurant and bar

Goldmarie, restaurant

ROSENGARTEN, ROSE GARDEN

A little insider tip is the enchanted rose garden with its over 200 types of roses, which is somewhat hidden on the Isar and invites the public to take a stroll and linger. It was initially created from the Bischweiler municipal tree nursery as a test garden for rose species.

A TRUE LUXURY
EVERYTHING CLOSE BY

Many cultural gems are located in direct proximity between the Münchner Volkstheater in the south and the Gärtnerplatztheater in the north. There are gourmet restaurants, hip pubs, cafes and bars. The section of Thalkirchner Straße 80 is in a traffic-calmed zone with a maximum speed limit of 30 km/h. Whether you want to visit the beautiful Dreimühlenviertel, go gourmet shopping in the Frische-paradies in Schlachthofviertel or take a stroll and visit the shops in Glockenbachviertel, everything is easily reachable on foot, by bike, on a protected bike path along the Isar, or by public transport.

A little further down the Isar, the European and German Patent Offices attract international clientele to the region, as does the German Museum on Museum Island, which provides fascinating insights into the history of German science and technology.

There is also a wide range of sporting activities on offer: in addition to the nearby Schyrenbad, the historically beautiful Müllersches Volksbad and the Isar itself, along whose banks a footpath and cycle path stretches to the Flaucher in the south and the Englischer Garten in the north, there is an extensive sports facility on the river within walking distance.

It couldn't be more practical for families with small children. There is a kindergarten within the Stadtpalais. A number of kindergartens and several schools are in the immediate vicinity, including the Theresiengymnasium and the Städtische Berufsfachschule. Beautifully laid out playgrounds can be found directly on the other side of the street at the Südfriedhof and the Glockenbach.

The Neo-Renaissance facades are characterized by symmetrically arranged windows and entrances and feature formal elements based on models from the classical antiquity and the Renaissance: pilasters, columns, cornices, and segmental arches. The level of decoration indicates the status of the house; each floor has its own character. The lower part shows cut natural stone blocks, followed by the more luxurious apartments with rich facade decoration.

Floral patterned wallpapers contrast with strictly geometric tiles in the Italian style. They are characteristic of the graceful style of the Neo-Renaissance.

NEO-RENAISSANCE

A LISTED NEO-RENAISSANCE MONUMENT

The Neo-Renaissance style is a movement of historicism in the 19th century that draws on the Italian or German Renaissance architectural style. The Neo-Renaissance style was used primarily for banks, townhouses and educational institutions.

The Stadtpalais, listed for historical protection, was designed in 1879 by architect Kaspar Griner in the Neo-Renaissance style and built as an ensemble with the Gartenpalais, also listed for historical protection.

The Stadtpalais's representative facade received the 2004 facade award of the city of Munich. As part of our renovation work, the stucco facade and the windows were carefully restored, and the attics were expanded and dormer windows added.

STADTPALAIS

THE STADTPALAIS OF 1879 TENDERLY RENOVATED AND MODERNIZED

The Stadtpalais comprises 13 apartments and a small kindergarten. The former attic was converted into an attractive 144 sqm penthouse with a wood-burning fireplace, air conditioning and roof terrace while retaining the historic beam structure. The 55 to 65 sqm apartments, three on each floor, were tenderly renovated according to historical models. Herringbone oak parquet flooring with a surrounding frieze, white panel doors custom-made by carpenters, crown moulding and high-quality individual bathrooms transform each apartment into a charming home. Newly added, spacious balconies lead onto the green courtyard garden.

The staircase impresses with its extensive renovation, refined with ornamental wallpaper and crown mouldings, and the installation of a passenger elevator. The entire building technology was modernized and a gas-solar hybrid heating system was newly installed.

The spacious and bright penthouse apartment in the Stadtpalais extends over 144 sqm and offers a fantastic view over the roofs of Munich. The impressive roof structure was renovated using dry-ice blasting and provides a ceiling height of well over three meters up to the ridge. Air conditioning in summer and the fireplace on cooler days enhance the quality of life.

Spacious, high-quality bathrooms with bathroom ceramics from Laufen and fittings from Dornbracht and Carlo Fratini, tiles in the diamond decor typical of the Neo-Renaissance period by Carmen Ceramica, illuminated mirrors and rain showers.

55-65 sqm large, well-designed apartments with 3 rooms, large balconies facing the courtyard, perfectly laid herringbone parquet, and expertly crafted panel doors.

In the Neo-Renaissance style, parts of the staircase were decorated with ornamental wallpaper, contrasted in two colours and enhanced by contemporary lighting.

GARDEN APARTMENT

A PERFECT PLACE TO LIVE, OVERLOOKING THE COURTYARD GARDEN

The 67 sqm garden apartment is a very special gem with its own entrance, its own terrace, and an enchanting view of the green courtyard garden. The garden apartment has a thermally insulated facade and new cassette windows that let a lot of light into the two loft-like rooms. The custom-made white panel doors harmonize with the high-quality oak herringbone parquet with surrounding frieze and create a pleasant room atmosphere. In addition to a separate guest toilet, the spacious bathroom offers plenty of space to relax.

THE COURTYARD GARDEN AN AMBIENCE TO LINGER AND FALL IN LOVE WITH

We had a landscape architect redesign the courtyard area to create a suitable setting for the historic Palais ensemble. There are no more parking spaces in the courtyard; instead, there is plenty of room for bicycles. There is no more asphalt, but paths made of natural stone are laid out in the „Herbstlaub“ pattern.

The principal stylistic element is a large circle with a central tree, extensive lawns, and selected plants. The courtyard garden is closed off from the street with a gate, so all house entrances are safe and can only be reached privately.

GARTENPALAIS

THE GARTENPALAIS OF 1880 COMPREHENSIVELY RENOVATED AND CAREFULLY EXPANDED

The Gartenpalais, which is also a for historical protection listed building, was planned as part of the construction of the Stadtpalais in its rear area and then built as an ensemble in 1880.

We converted the attic into a new 140 sqm penthouse apartment and comprehensively and individually renovated and technically modernized 15 apartments ranging from 37 to 73 sqm on three floors. Resulting in attractive and comfortable apartments in a quiet location.

A special highlight is the magnificent staircase with its beautiful historic glass dome. During the renovation, it was equipped with exclusive floral wallpaper, contrasting wall colours, and glass lights from the Berliner Messingleuchten manufacturer.

THE PENTHOUSE APARTMENT

The converted attic spans the entire area of the Gartenpalais and impresses with its exceptionally refined room layout. The living area with a wood-burning fireplace and fantastic roof terrace and the private area with the master bedroom and guest room lay on opposite sites of the penthouse and are connected by the spacious cooking and dining area with a kitchen island and a large sliding window. Air conditioning and stylish bathrooms with exquisite ceramics and high-quality fittings go without saying. A place to feel good.

The historic beam structure was renovated using dry-ice blasting, giving the rooms their own individual character.

The master bedroom's clever layout was designed to create a modern sense of space, just like in boutique hotels; open-plan, wellness bathroom and bedroom in one room. Naturally with separate WC and utility room. And air-conditioned, of course. You can dream under a starry sky through the skylights above the bed.

ENCHANTING APARTMENTS WITH INDIVIDUAL DETAILS IN MANY DIMENSIONS

All apartments are attractive two-room gems with balconies and a desirable floor plan. In some apartments we were able to make the brickwork and beam construction from 1880 visible, install wood-burning stoves or even create a large roof terrace. In all apartments you will find custom-made, white paneled doors in perfect harmony with herringbone parquet with a surrounding frieze. Of course, we have rebuilt all bathrooms just as beautifully as in the most expensive penthouse apartments for ideal well-being.

STUDIO IN THE SOUTERRAIN ON 63 SQM

Who doesn't dream of a studio in the souterrain with a small private terrace? Regardless of whether you realise an office, a workshop or another dream. The studio has great charm.

WITH ITS OWN IN-HOUSE FITNESS AND WELLNESS

A pleasant lifestyle. A fully equipped gym with a sauna awaits you. Completely private, reserved only for residents of the Palais ensemble.

GREAT RENOVATION RESULT WITH MASTER CRAFTSMANSHIP

The renovation of the, for historical protection, listed Neo-Renaissance palais was not an easy task, but it was an extremely appealing and rewarding one. After 30 months of construction and around 90,000 hours of master craftsmanship, the Palais ensemble now shows itself in its perfect beauty. We pay our utmost respect to all the craftsmen who, with the greatest attention to detail and sometimes under the most challenging conditions, have brought this gem back to life together with us, and we are delighted with the wonderful overall result.

30 MONTHS

In the style of the Neo-Renaissance, parts of the staircase were decorated with floral patterned wallpaper.

90,000 HOURS

PREMISES

AN INVITING PROPERTY WITH AMBIENCE

The Palais ensemble is located on a 940-square-meter lot of land. It harmoniously complements the neighbouring building, which was built at the same time. The result is the distinctive appearance of a genuinely stately architectural work of art of the Neo-Renaissance period.

Our Palais ensemble, with its own courtyard entrance and the neighbouring buildings further out to the north, provides a spaciousness and generosity rarely found in the city centre..

BUILDING DESCRIPTION

GENERAL BUILDING DESCRIPTION

- Renovated facades and stucco work based on existing models, in the Stadtpalais based on the model of the 2004 facade prize of the state capital Munich
- Restored existing windows and installation of new windows, each with new fittings from Karcher Design, Schöntal series
- Newly constructed roof truss while retaining the renovated, historic supporting structure
- New roof insulation and cladding of roof and dormers with new sheeting, new gutters and rainwater pipess
- Renovated existing staircases with ornamental wallpaper and crown mouldings
- New elevator from Schindler from the ground floor to the top floor in the Stadtpalais
- Custom-made white panel doors, partially with overhead light, with fittings from Karcher Design, Schöntal series
- In the Stadtpalais new balconies face the courtyard with stylish railings and larch wood flooring
- Terraces and roof terraces with larch wood flooring
- Continuous ventilation of the storage rooms in the vaulted cellars
- New gas condensing boiler in combination with solar thermal energy
- New heating and water pipes
- New electrical and media installations with fiber optic connection
- New rainwater drainage with retention gutters
- Landscaped courtyard garden, closed off from the street, with bicycle parking, firewood storage and playground area
- Communal fitness room with a sauna in the Gartenpalais

Note: This building description is non-binding. Specific deviations depend on the type of apartment. Reference is made to the detailed building description and contractual regulations in rental or purchase contracts.

DESCRIPTION OF THE APARTMENTS

- Three-layer oak parquet in herringbone laying with all-round edge frieze and white profile skirting boards on levelled existing floors
- Custom-made white panel doors, partially with overhead lights, with fittings from Karcher Design, Schöntal series
- Custom-made white wooden window sills with rounded profile corners
- Suspended ceilings with surrounding crown moulding
- Wood fireplaces in top-floor apartments and wood-burning stoves in selected apartments of the Gartenpalais.
- High-quality tiles from Carmen Ceramica Montmartre gris series on floors and Memories Look Smoke series on walls
- High-quality bathroom ceramics with bathroom furniture from Laufen, New Classic series
- High-quality bathroom fittings based on contemporary designs by Dornbracht and Carlo Frattini
- Washing machine connections in utility rooms, bathrooms or kitchens
- New white radiators
- Electrical system with switch range from Gira and LAN cabling
- Video intercom system from Busch-Jäger
- Air conditioning systems for the penthouses
- Storage rooms
